

A Child Theme for Divi by Ania Romańska

Installation & Customization Instructions

Version 1.2 - November 2017

Requirements

You must have the [Divi Theme by Elegant Themes](#) installed to use this Child Theme.
An Elegant Themes Membership is required to download the Divi Theme.
The Divi Theme is NOT included with this child theme.

Please note:
the images in the demo have been replaced with placeholder images in the actual theme files.

Ensure you have the Divi Theme installed and activated prior to installing the Meetly Child Theme.

To avoid any issues during installation it is highly recommended that you use this child theme on a fresh installation of WordPress.

It is also a good idea for SEO purposes to navigate to:
Settings > Permalinks and set the **Common Settings** to **Post name**.

Permalink Settings

WordPress offers you the ability to create a custom URL structure for your permalinks and archives. Custom URL structures can improve the aesthetics, usability, and forward-compatibility of your links. A [number of tags are available](#), and here are some examples to get you started.

Common Settings

☐ Plain

http://divilover.com/meetly/?p=123

☐ Day and name

http://divilover.com/meetly/2016/09/21/sample-post/

☐ Month and name

http://divilover.com/meetly/2016/09/sample-post/

☐ Numeric

http://divilover.com/meetly/archives/123

☒ Post name

http://divilover.com/meetly/sample-post/

☐ Custom Structure

http://divilover.com/meetly

Optional

If you like, you may enter custom structures for your category and tag URLs here. For example, using `topics` as your category base would make your category links like `http://divilover.com/meetly/topics/uncategorized/` . If you leave these blank the defaults will be used.

Category base

Tag base

Preparation

Step 1.

After purchase, download the *unzipme_meetly.zip* file from your account page at the marketplace you purchased from or click the download link in your purchase confirmation email.

Step 2.

Unzip the *unzipme_meetly.zip* file to your computer, it contains the following files:

- meetly_child_theme.zip* - the Meetly child theme file
- meetly-bloom-settings.json* - predesigned Bloom Optin Form settings

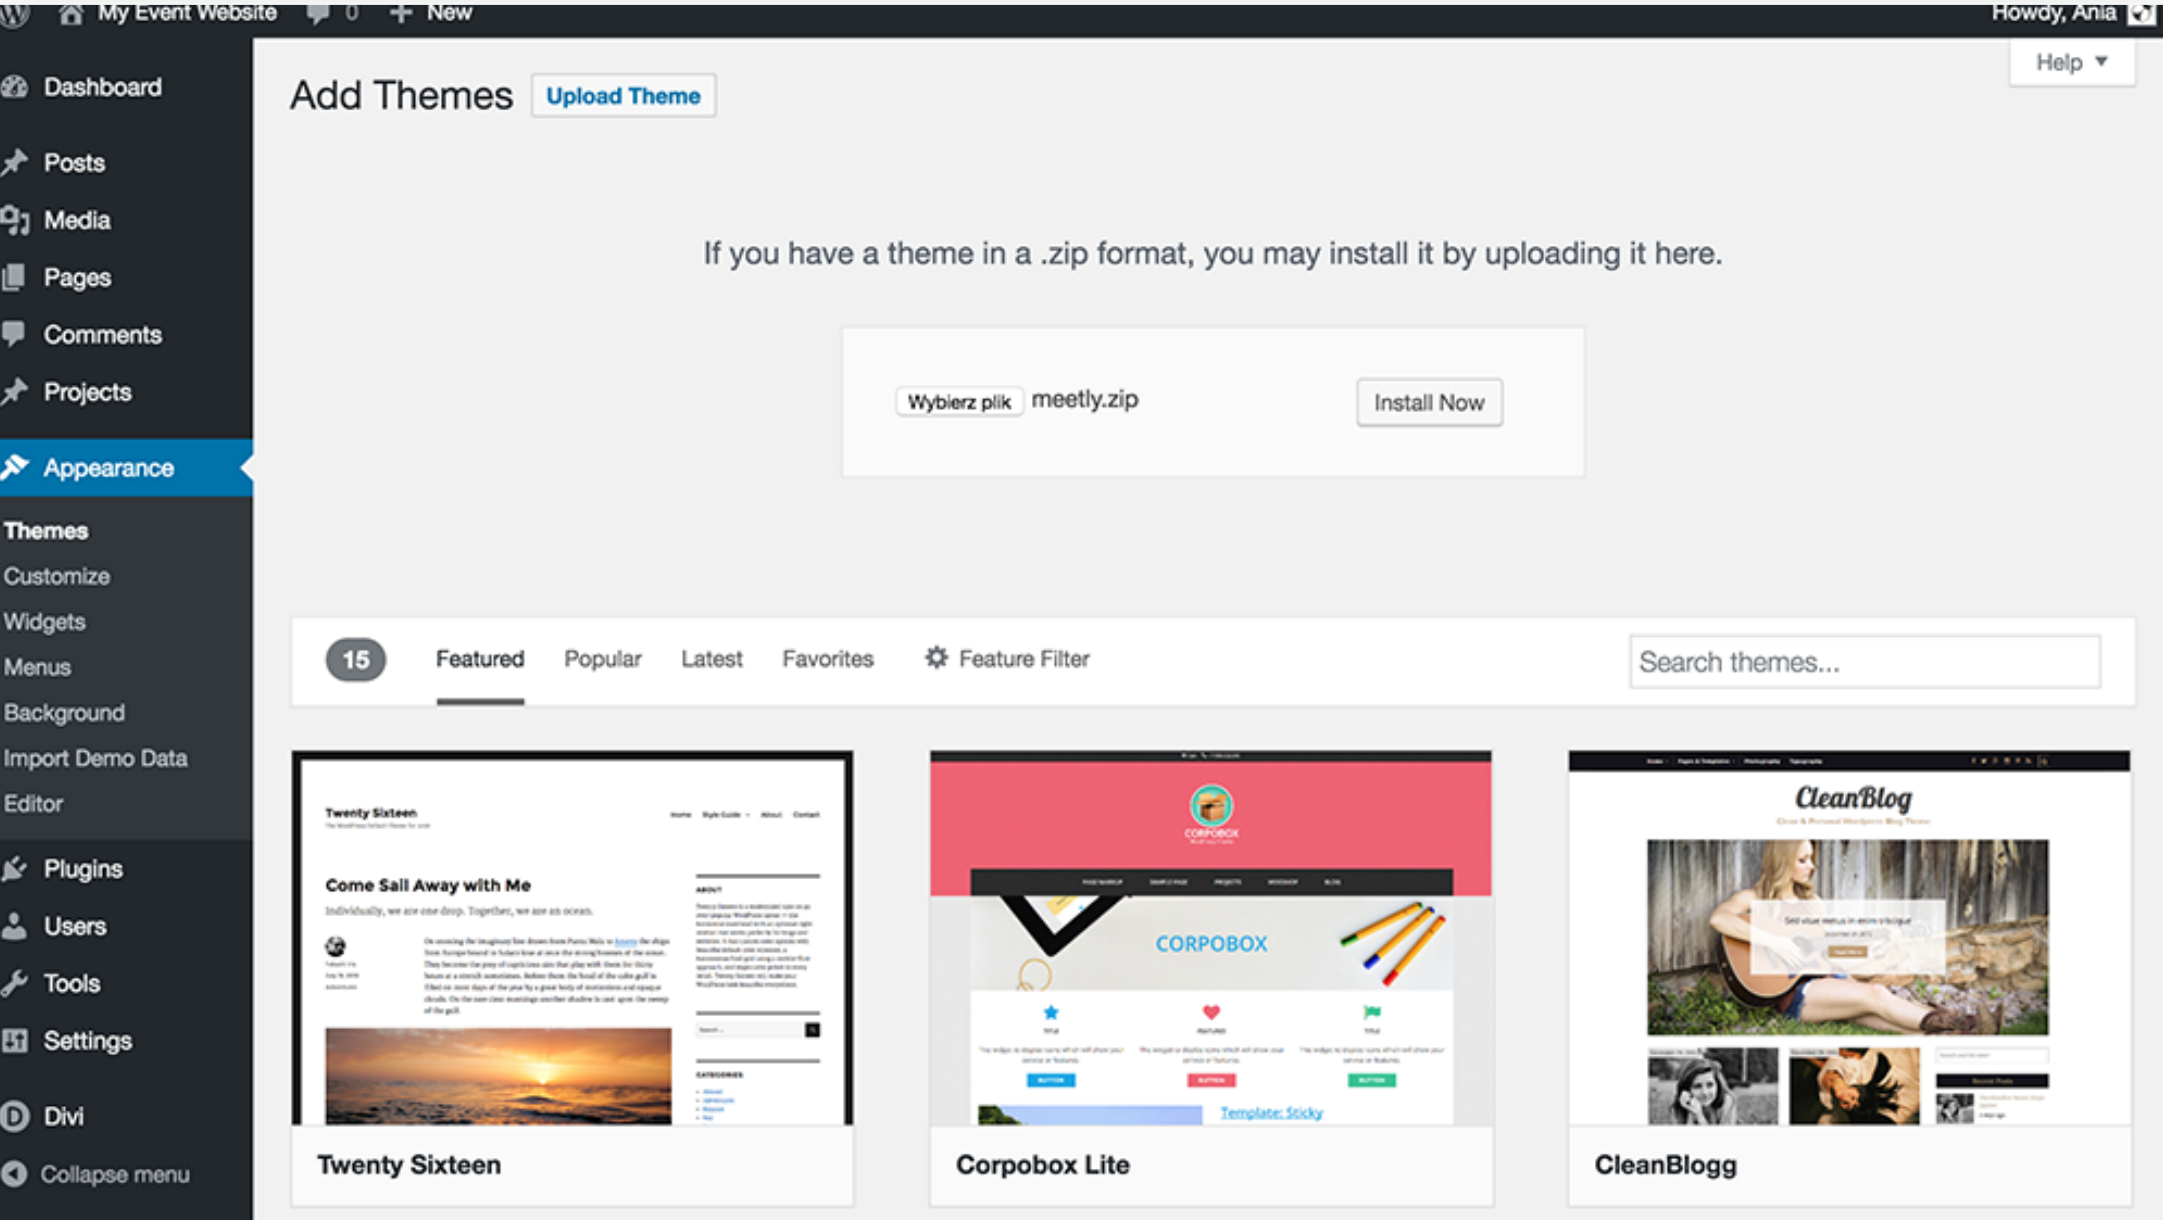

And the following in the **Backup Files** folder:

- demo-content.xml* - the Meetly theme demo content
- theme-settings.dat* - the Meetly theme customiser settings
- style.css* - a backup of the Meety style sheet
- changelog.txt* - a list of notable changes for each version of Meetly.

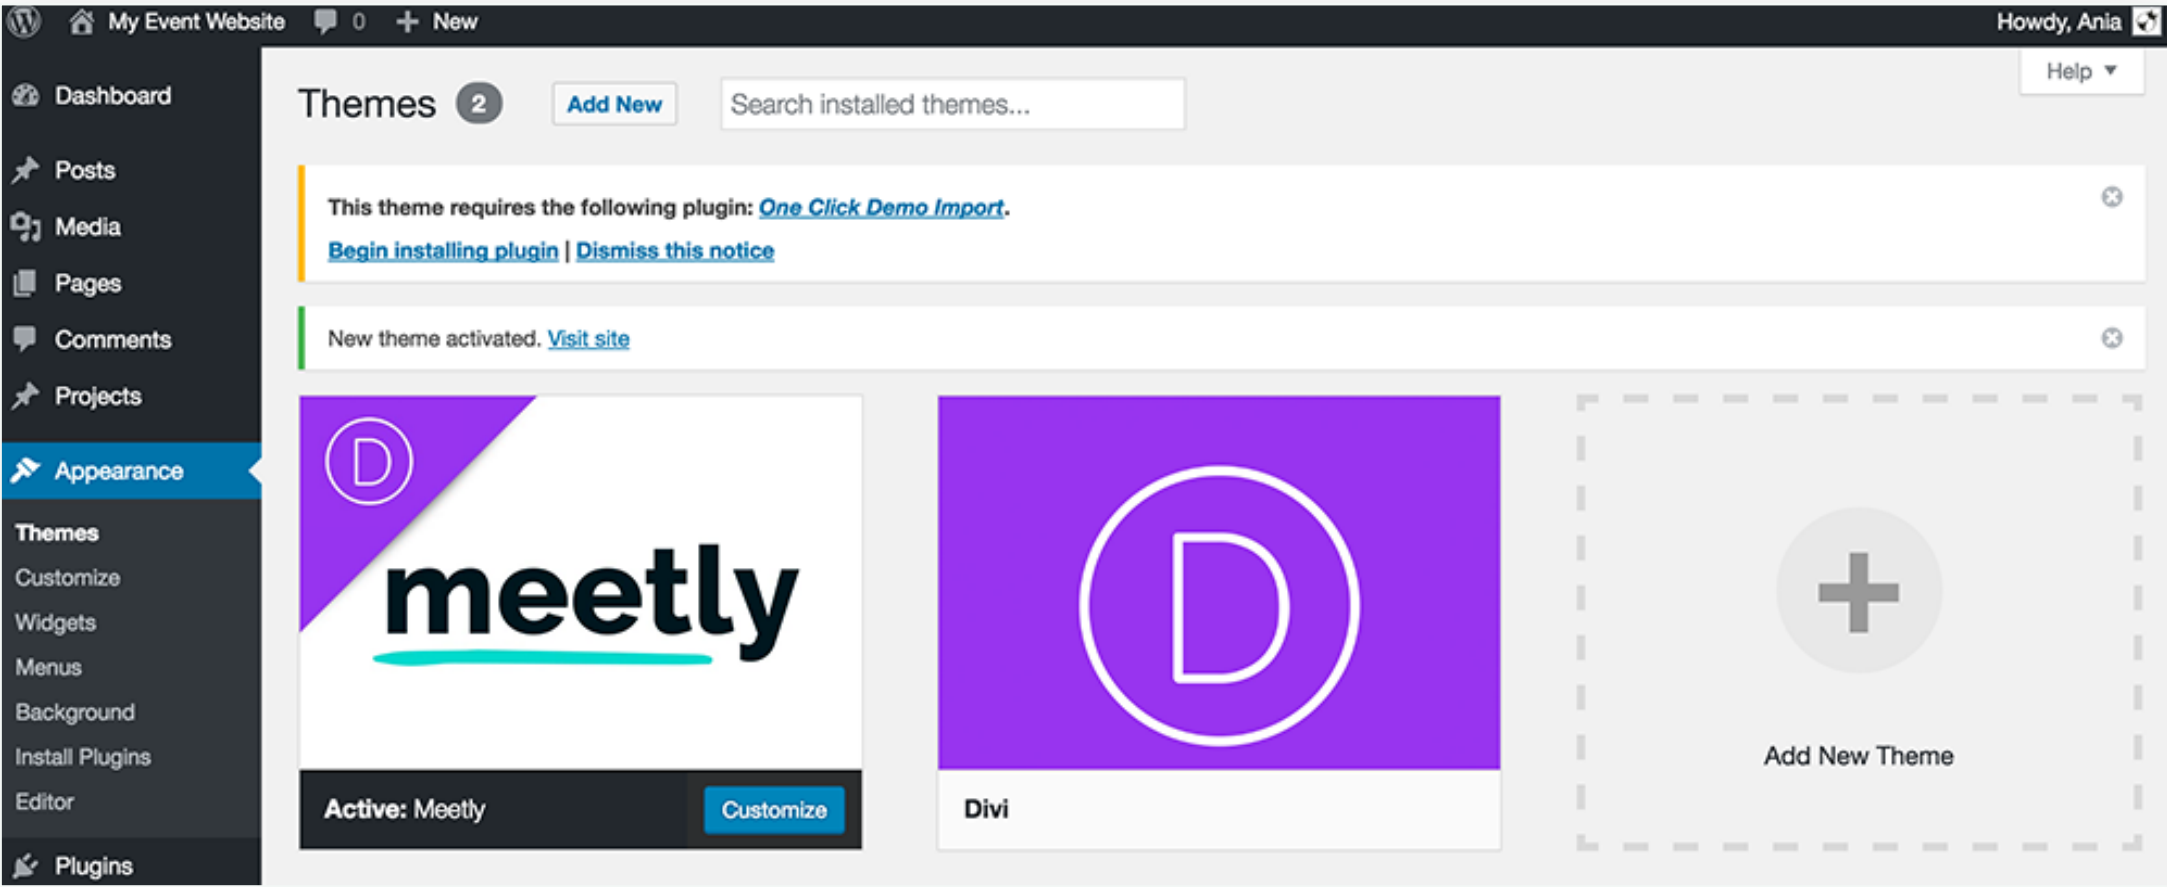

Theme Installation

Step 3.

In your Wordpress admin panel navigate to **Appearance > Themes > Add New** and click on **Upload Theme**. Locate the *meetly_child_theme.zip* file on your computer and then click **Install Now**.

When the install is complete click on **Activate**, you will then see the Meetly Child Theme as the active theme in your theme panel.

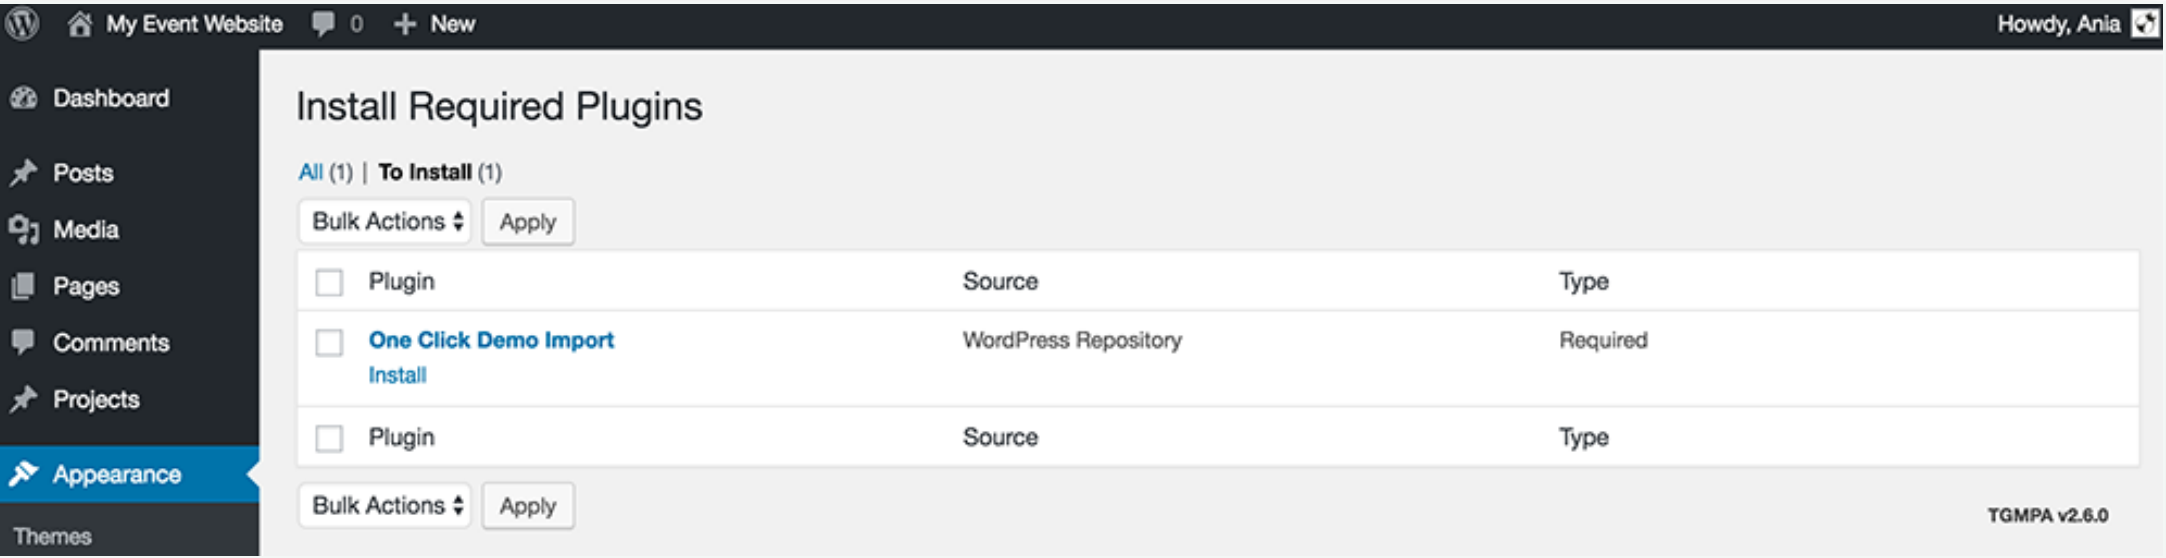

Plugin Activation

Step 4.

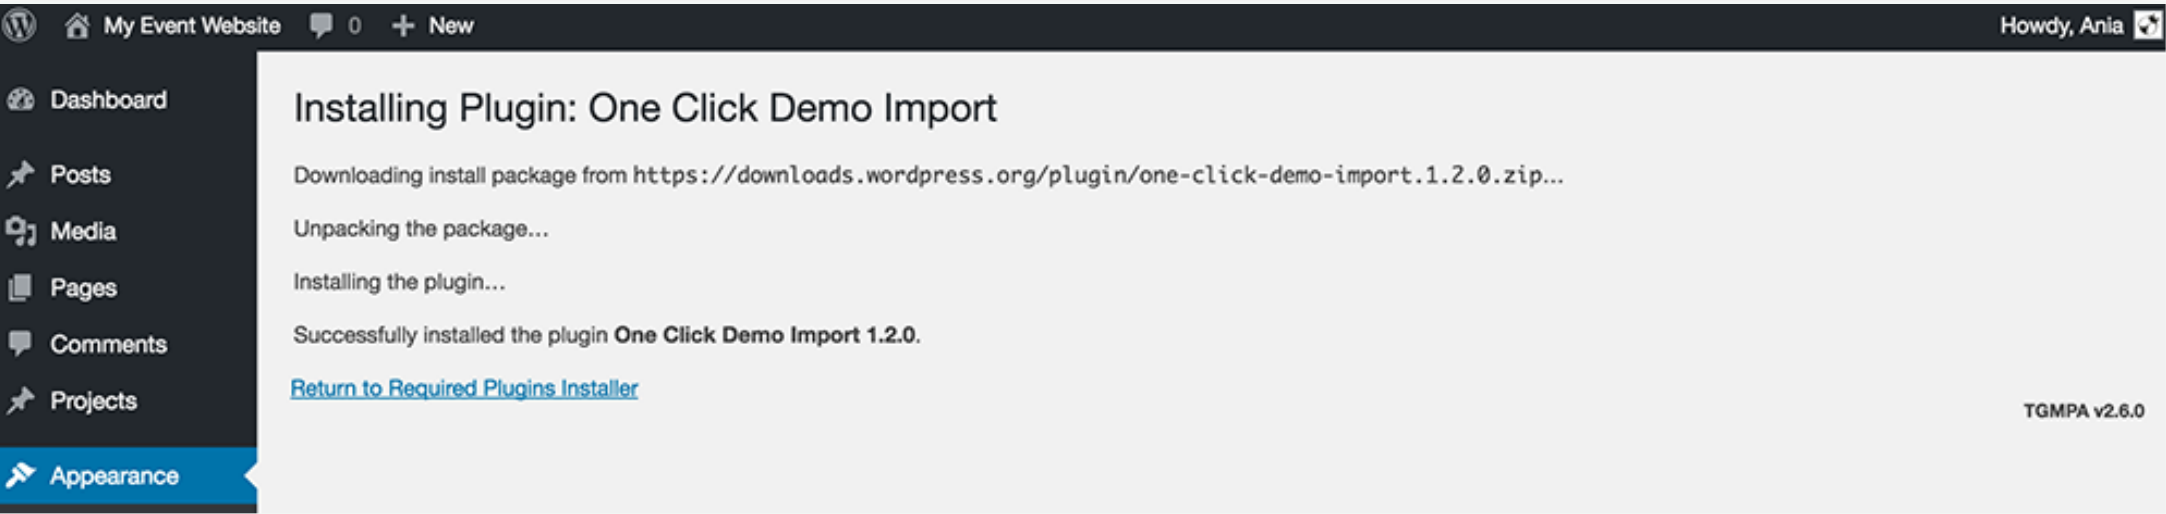

Above the theme images you will see a notification telling you which plugin Meetly requires. Click on **Begin Installing Plugins**.

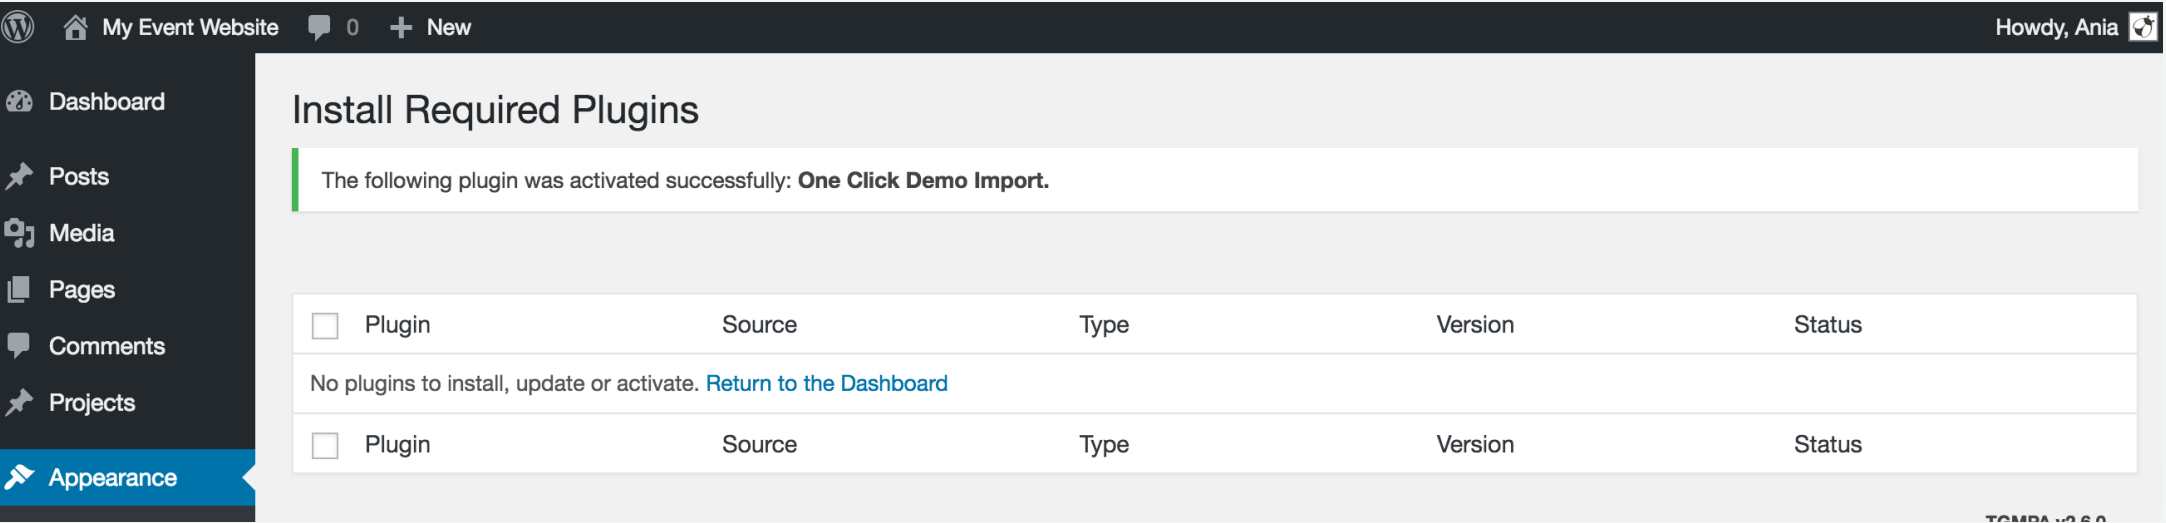

Next, click **Install** under the plugin name, this will install the One Click feature to import all the demo content and settings.

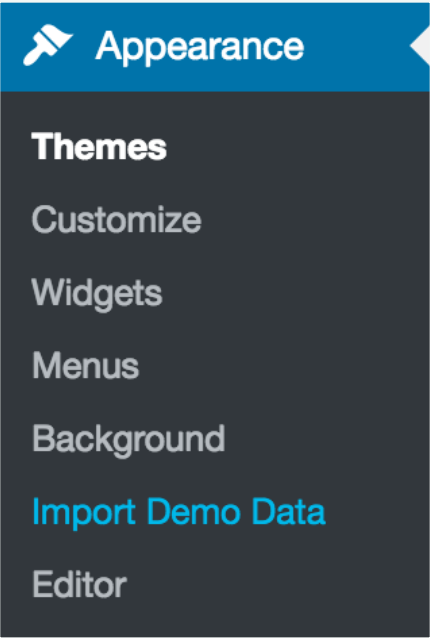

When the install is complete click on **Return to Required Plugins Installer** to activate plugin.

When the plugin has been activated you should see this screen. Click on **Appearance** in the left hand menu to refresh the page.

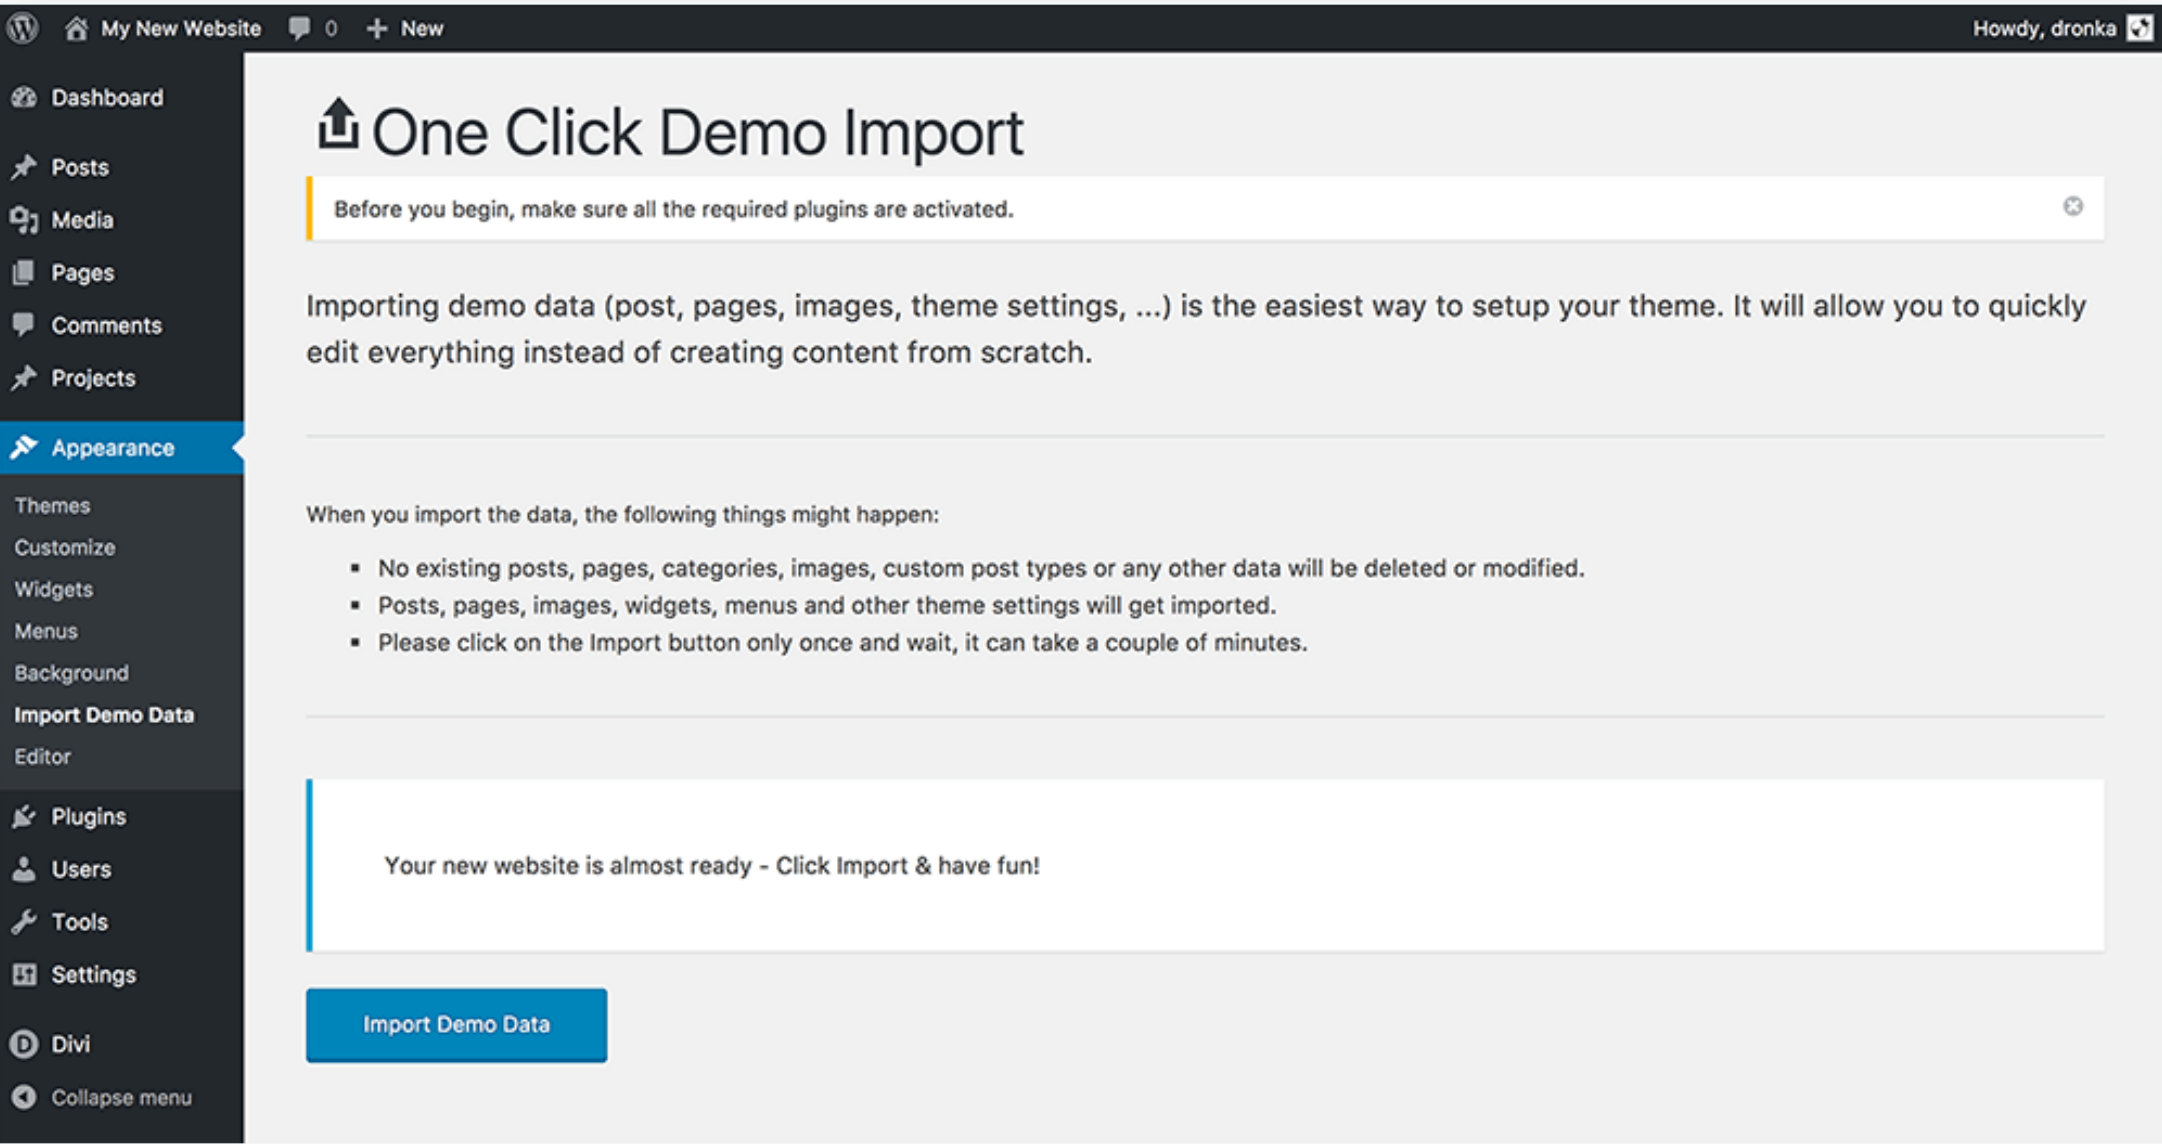

Import Settings & Demo Content

Step 5.

You will now see a new submenu item under the *Appearance* menu called *Import Demo Data* click on that item.

Next you will see this screen with a blue button called *Import Demo Data*. Click the button only once and wait, it can take a couple of minutes.

After a little while you should get the following message that the demo data has been imported successfully. You can now deactivate and remove the One Click Demo plugin if you wish but you don't have to. That's it!

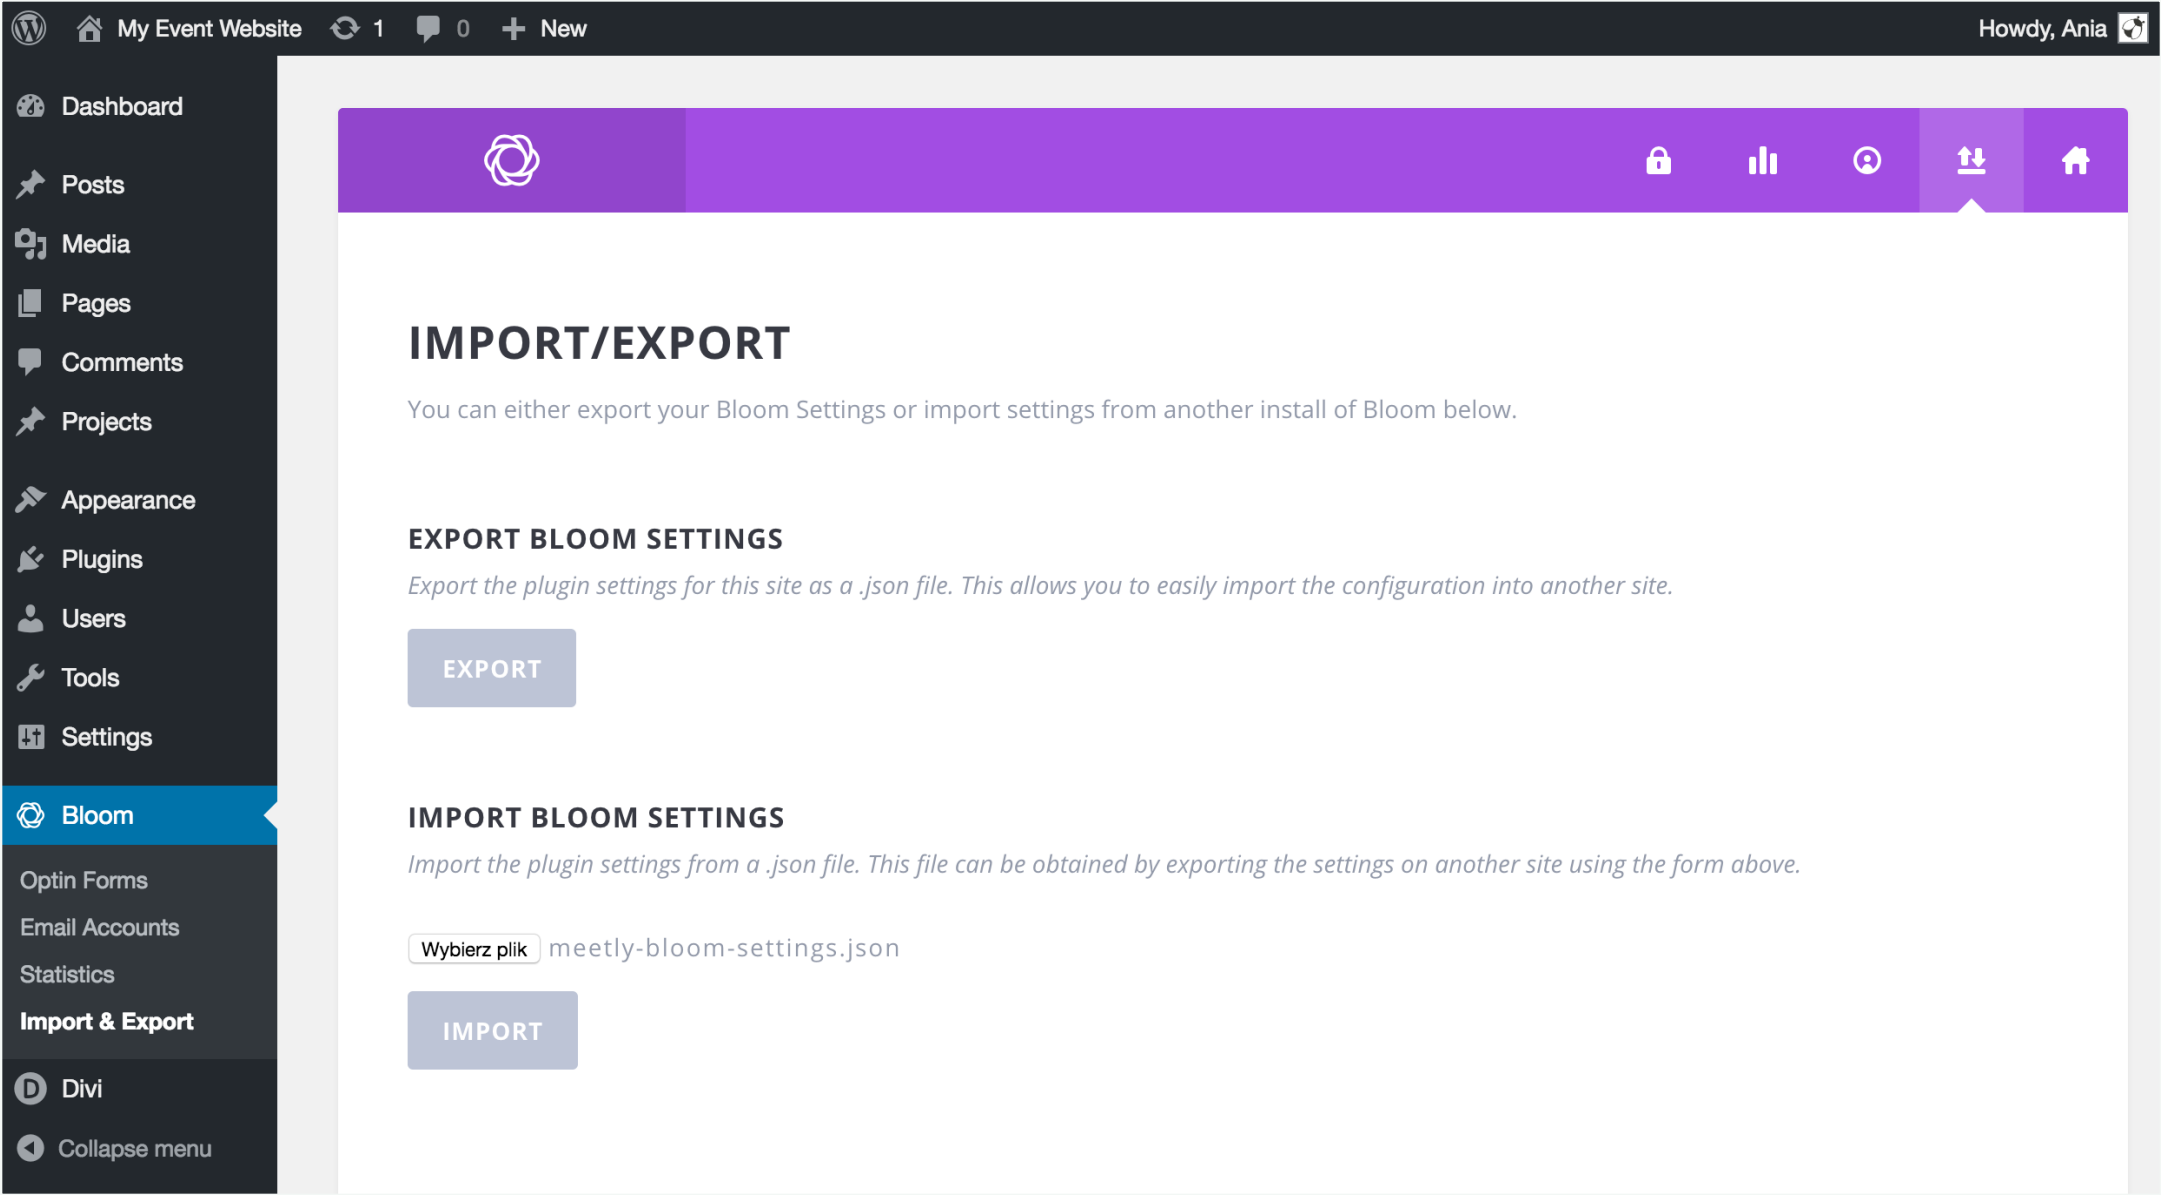

Bloom Optin Forms

Meetly comes with one predesigned Bloom Op'n form. The inline op'n form in the „Stay in touch” section on the homepage of the demo.

To import the Bloom form you must have Bloom installed which is not included with this child theme.

With Bloom installed, in the WordPress admin panel navigate to **Bloom>Import & Export**, select **Choose File** under **Import Bloom Settings** and select the file called *meetly-bloom-settings.json* from your computer, then click on import.

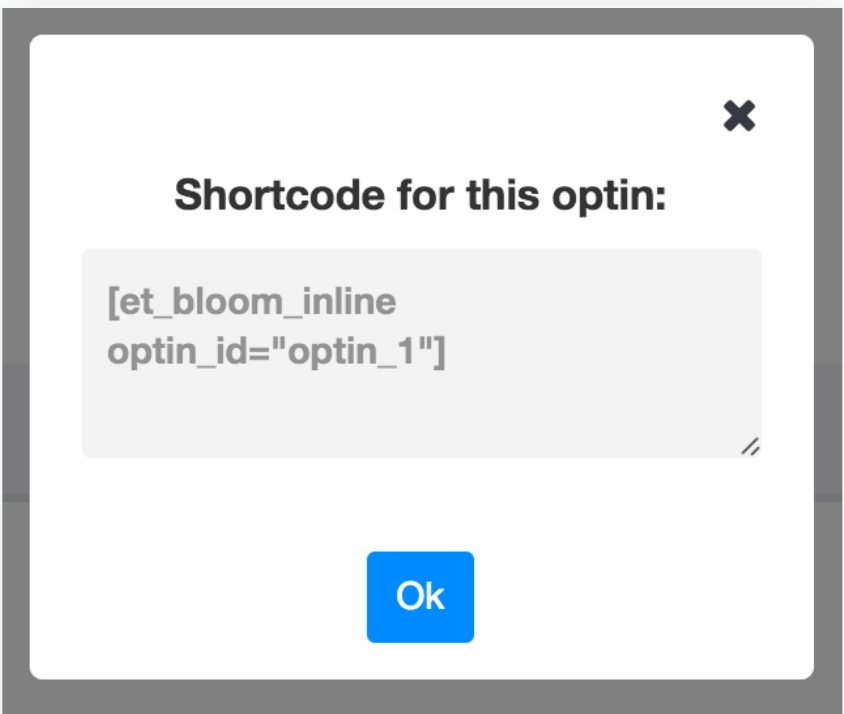

You should get a message saying the import was successful, next click on **Bloom > Option Forms** and you will see new form in the *Inactive Optins* section.

OPTIN NAME	IMPRESSIONS	CONVERSIONS	CONVERSION RATE	
 SLIM EMAIL SIGNUP	0	0	0%	    

Click on the cog icon to open the form settings and choose your email service provider, account and list. Your email service provider may need to be configured in **Divi > Theme Options** first depending on who you are using.

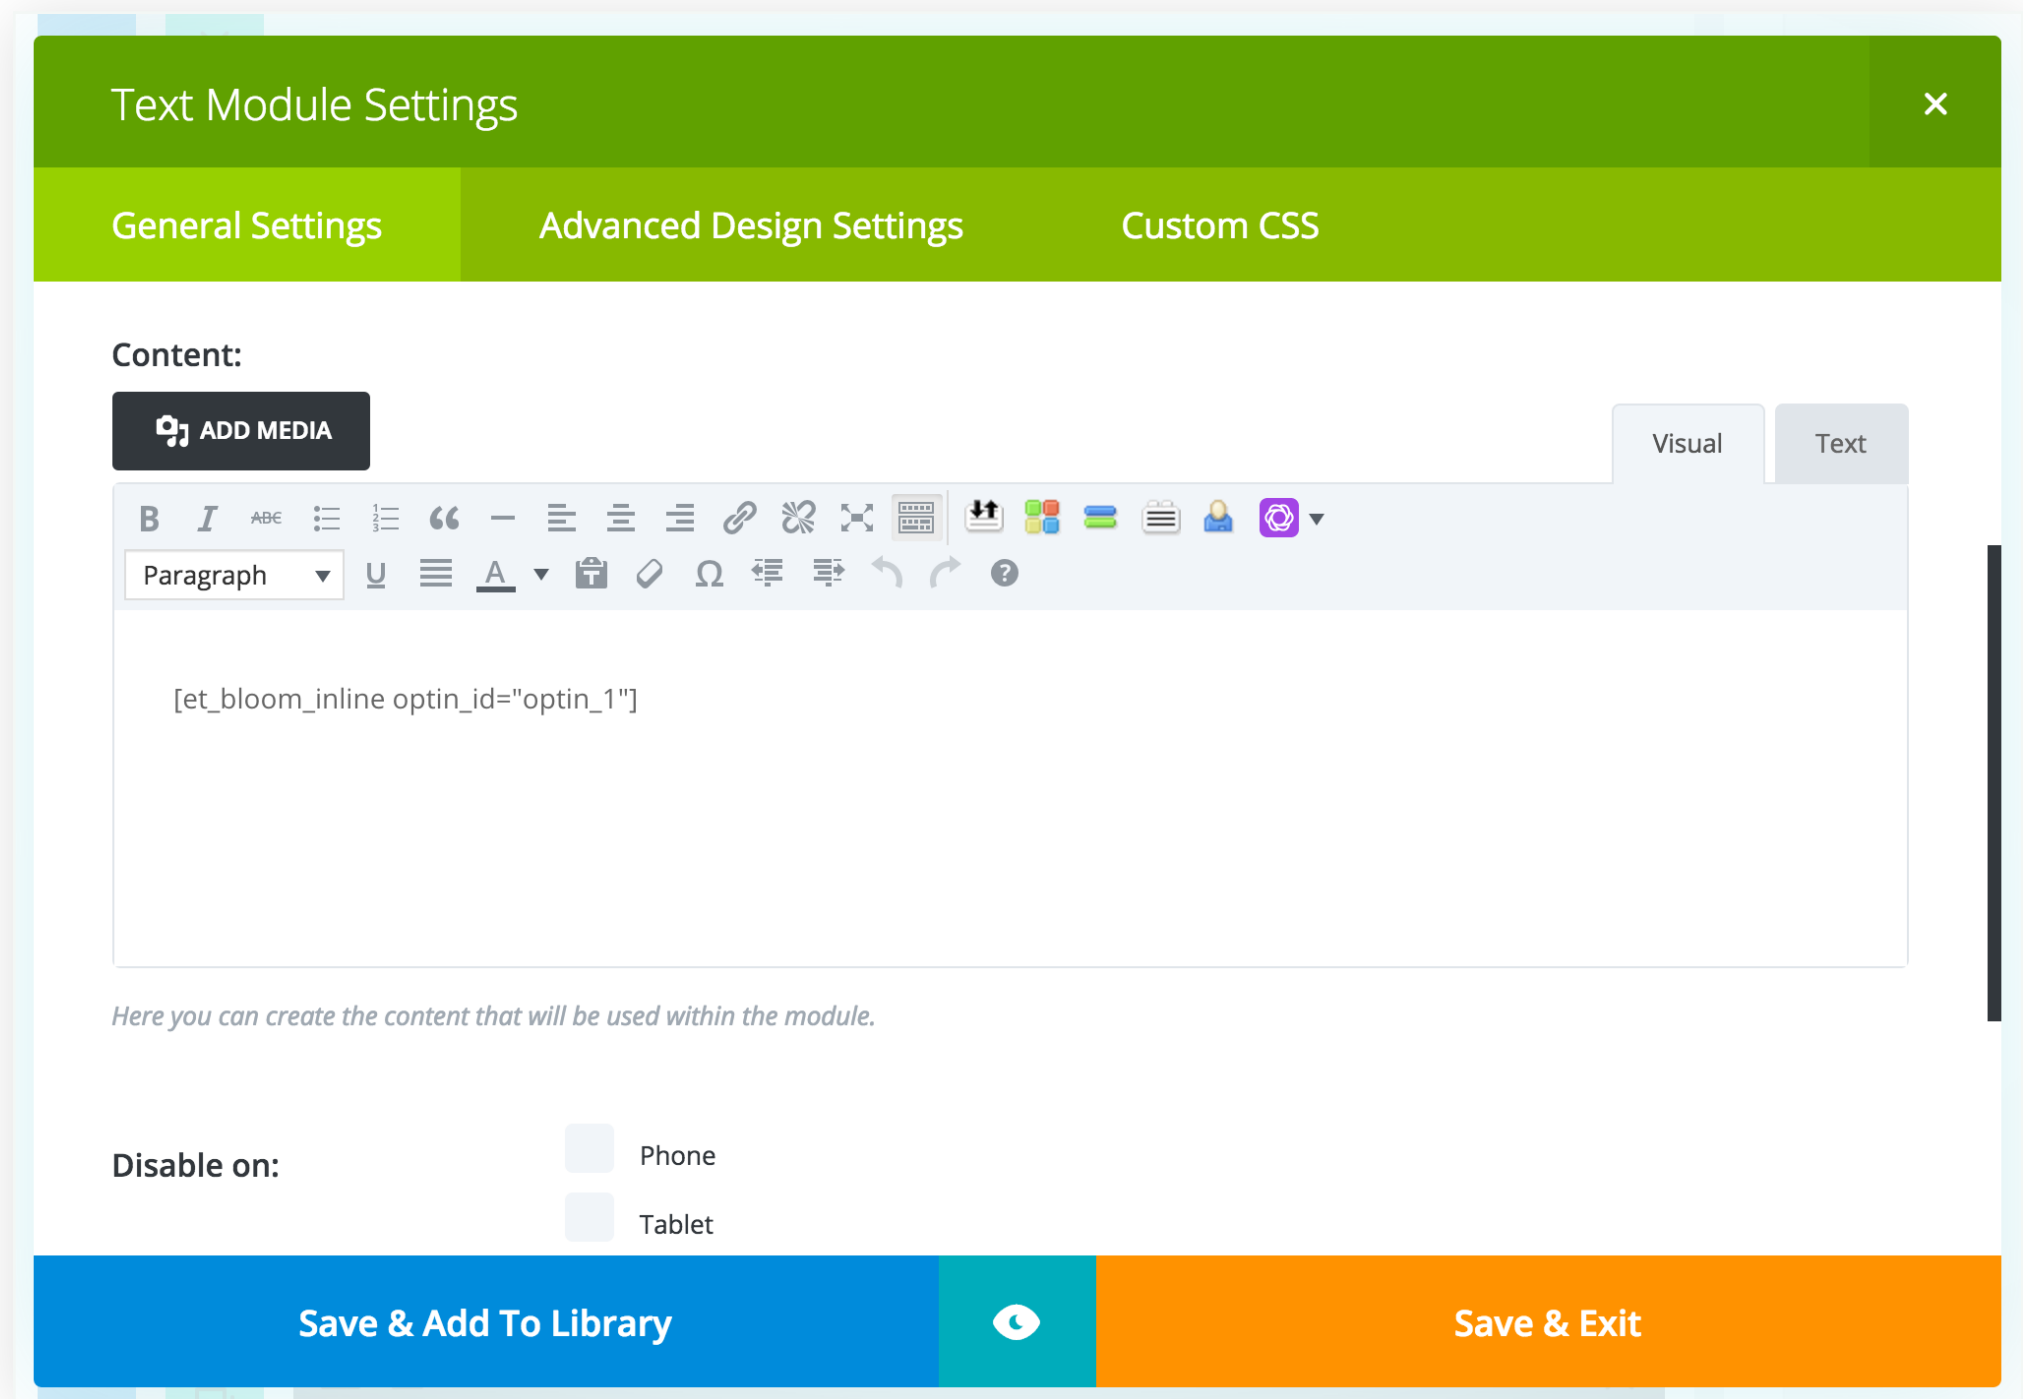

When done, be sure to click on the tick icon to activate the forms and they will move up into the **Active Optins** section.

Next click on the brackets icon to generate shortcode for the Slim Email Signup and check the ID number of the optin form.

If you have not created any forms previously, it will be imported with the ID of 0 or 1, if you have created forms already Bloom will assign a new ID. If the ID is different make a note of it.

To use the Bloom inline optin form open the module on the home page and check the ID number in the shortcode matches with your version, if not replace with the ID of your form. Save and refresh the page and your form should appear.

All done! :)

If you require theme customisations or new website development you can contact me at hello@divilover.com for current rates.

Thank you for using the Meetly Child Theme.

If you have any issues using this child theme please contact support@divilover.com

License information
